

# ASHPAN RASKAR

## EXPERIENCE

### Hack Western: Competitor

November 27 - 29 2015

Attended a hackathon at Western University with a friend and created a team and learned how to program an android app. The idea for the hackathon was to create an app that helps students find tutors called Tuber. Tuber is an Uber service for tutoring. Tuber allows the user to find many different tutors in your area for the ease of students. The user can search by price, subject, and distance away from them.

### Rogers TV: Camera and Audio Operator

July - November 2015

Helped with filming Little League Sports and CAF TV program for the Rogers TV News Channel. Gained experience with advanced recording video cameras, handling audio technicalities, and using graphics for TV channels.

### Tech Retreat Hackathon: Competitor

August 2015

Attended first hackathon with a friend and learned many new skills. The project created was called Throwback Hack. The idea was to allow people to relive their childhood. This was done simply by asking a few questions such as age, name, and ethnicity, then using some API's, pictures, videos, and songs from their childhood would be outputted for the user to relive through.

### TriFun Kids Triathlon: Bike Assistant

Summer 2014-15

Provided support to younger children aged 3 - 13 during the race. The aid included providing directions, helping participants on and off their bikes, escorting their bikes to a bike rack, and any other possible aid to give to the children to make the Triathlon better.

### First Lego League: Team Leader, Head Programmer

2013 - 2014

Co-lead Scinadoes, a team of 9 people to create a robot and a project to solve a natural disaster. Was also one of the head programmer to create multiple autonomous programs for the robot to complete specified missions.
